

Rheem Water Heaters

2600 GUNTER PARK DRIVE EAST • MONTGOMERY, AL 36109-1417

June 16, 2021

To Whom It May Concern:

Subject: Non-metallic vent system materials certified for use with Rheem, power vent and power direct vent, gas-fired water heaters:

Rheem residential & commercial, power vent, power direct vent and tankless power direct vent, gas-fired water heaters are CSA (Canadian Standards Association) certified to the CSA/ANSI Z21.10.1:2019 • CSA 4.1:2019 (Residential) and CSA/ANSI Z21.10.3:2019 • CSA 4.3:2019 (Commercial & Tankless) applied standards to use specific non-metallic pipe and fittings for venting.

Please refer to Use & Care Manual provided with the water heater for detailed venting system installation instructions and requirements.

In addition to the non-metallic vent materials listed in the Use and Care manual, Rheem allows use of venting materials certified to UL-1738 or for Canada ULC-S636. These vent materials, including PVC, CPVC, Polypropylene pipe and fittings may be installed for venting and air-intake, with sizes and lengths as specified in the Use and Care manual and vent system manufacturer instructions.

Sincerely,

A handwritten signature in black ink, appearing to read "Larry Kidd".
